

The American Cancer Society National Breast Cancer Roundtable's Clinical Trials Navigation Survey

Help inform the future of clinical trial access across all cancer types.

Open: September 1 – October 2, 2026

The American Cancer Society National Breast Cancer Roundtable (ACS NBCRT) invites professionals across all cancer types to complete and share the Clinical Trials Navigation Survey. This national survey is designed to better understand how organizations support people across the clinical trials continuum, including:

- Clinical trial access
- Recruitment and enrollment
- Patient navigation
- Retention and continued participation
- Patient support services

Who should participate? We welcome responses from oncology clinicians, research staff, patient navigators, social workers, administrators, and community or advocacy organizations. Multiple individuals from the same organization are encouraged to participate and share their unique perspectives.

Patients, survivors, and caregivers: Thank you for your interest. **This survey is designed for professionals and organizational representatives.** Please consider sharing it with your oncology care team, clinic, navigator, research staff, or other health care professionals who may be able to contribute their perspective.

Survey Details:

Open: September 1 – October 2, 2026 | Time to Complete: 15–20 minutes

Your perspective matters. By sharing your experience, you can help identify opportunities to strengthen clinical trial access and support for people affected by cancer.
